

How to Tie Your Belt!

The TWO most common ways!

A

place belt on middle of stomach and wrap the belt around the back

2

belt goes around back and crosses. Both ends are brought around to the front

3

lay the left side of the belt down and the right side of the belt on top

4

right side of the belt, which is on top, tucks under both layers and comes out on top

5

place the belt on the left side over and on top of the belt on the right side leaving a hole

6

take the end of the belt on top up through the hole, pull both ends out to the sides

B

hold belt at your waist as shown here

2

wrap belt around your waist once...

3

and twice

4

pull left end up underneath

5

place the belt on the left side over on top of the belt on the right side leaving a hole

6

take the end of the belt on top up through the hole, pull both ends out to the sides
